

Designed for modern companies operating in office environments, remote work, and field operations.

CheckRH is a digital attendance management platform that enables companies to manage employee attendance in real time through WhatsApp, Kiosk, or QR codes, without requiring specialized hardware. It incorporates advanced validation technologies such as geolocation, facial recognition, voice-based activity logging, and geofencing, ensuring accurate, secure, and fully traceable records. Designed for organizations operating in offices, field environments, remote work, or across multiple locations, including different regions and time zones, CheckRH centralizes all operations in the cloud, enabling real-time visibility, operational control, and informed decision-making.

Technical Requirements – Employees

- Mobile device with WhatsApp installed
- Internet connection (WiFi or mobile data)
- Location services enabled
- Front camera available for facial validation
- Updated browser for validation links
- Permissions enabled (camera and location)

Technical Requirements – Administrator

- Internet-enabled device (desktop, laptop, or tablet)
- Updated browser (Chrome, Firefox, Edge, Safari)
- Stable connection for continuous access
- Minimum resolution 1280x720
- Allow pop-ups for system functions.

Multi-Company

- Manage one or multiple companies from a single platform
- Employee management per company based on plan
- Independent operational control per organization

Multi-Location

- Create and manage multiple locations
- Configure location, time zone, and validation method
- Custom geofencing with radius control
- Location or facial validation options

- Ensures attendance only in authorized areas
- Supports distributed operations across regions

Multi-Schedule

- Supports multiple time zones (LATAM, US, Canada)
- Configure multiple schedules per company
- Daily schedules including rest days
- Overnight shift support
- Schedule replication options
- Assign schedules per employee
- Tolerance configuration for check-ins and breaks
- Supports flexible work models

Non-Working Days

- Automatic country-based holidays
- Custom non-working days
- Editable official holidays
- Global or per-employee configuration

Employee Enrollment

- Individual and bulk onboarding
- QR/Kiosk access codes
- Full employee profile (name, tax ID, contact info)
- Assignment of location, schedule, department
- Flexible permissions (overtime, breaks, etc.)
- Validation settings per employee

WhatsApp Time Clock

- Check-in, break, and check-out via WhatsApp
- Commands: Check-in, Break, Resume, Check-out, Report
- Validation via geolocation or facial recognition
- Secure links with expiration
- Mobile device validation to reduce misuse
- Multi-location support
- Automatic daily summaries

QR/Kiosk

- Attendance via QR or kiosk device
- Fixed device setup for controlled access
- QR codes placed in physical areas

- Optional facial and location validation
- Traceability per employee and location

Reports

- Detailed attendance logs
- Employee summaries (hours, absences, delays)
- Geolocation reports
- Map visualization
- Daily dashboard with photos
- PDF export for administrative use
- Voice activity logging in real time

Employee Operational Management

- Employees identified via WhatsApp number
- Command-based interaction
- Automatic onboarding with facial enrollment
- Validation via location, facial, or both
- Photo evidence when enabled
- Geofence enforcement
- Multi-channel operation (WhatsApp, QR, kiosk)
- Real-time validation based on schedules
- Voice activity logging
- Automatic responses and summaries

Key Differentiators

- No app installation required
- No specialized hardware needed
- Advanced validation methods
- Custom geofencing
- Multichannel system
- Cloud-based and scalable

Service Guarante

- Guarantees operation of stable features
- Includes updates and improvements
- Valid under defined technical conditions
- WhatsApp service provided by Meta (third party)
- No control over WhatsApp outages

Security Information

- HTTPS secure transmission
- Cloud storage
- Role-based access
- Session security
- Backup and recovery
- Monitoring for anomalies

Infrastructure & Availability

- High-availability cloud infrastructure
- Scalable architecture
- Access from anywhere
- Continuous monitoring
- Updates without disruption

Software Demos

- Demo requests are available by contacting team@softwarepaq.com

Core Functions

- Plans are structured based on the number of employees.
- A single account allows the management of multiple companies and their respective employees.
- Licensing is available on a monthly or annual basis.
- Technical support is included through support tickets during the validity of the license

Included After-Sales Services

- Ongoing technical support for issue assistance, tracking, and resolution.
- Continuous platform evolution through functional enhancements at no additional cost.
- Automatic system updates without user intervention.
- Operational guidance to ensure proper use and optimal utilization of the system.

Pricing & Packages

- CheckRH offers a scalable plan structure based on the number of employees, allowing companies to select the package that best fits their size and operational needs.
- Each package includes full platform access, automatic updates, technical support, and functionalities according to the selected service level.
